

**Geometry**  
**Unit: Quadrilaterals and Polygons**  
**Section: Parallelograms**

**Review Worksheet**

Use parallelogram ABCD to answer the questions below.

- 1) Side AB measure 15 cm. What is the measure of side DC?
- 2) Side AD measure  $(6x - 2)$  ft and side BC measures  $(2x + 22)$  ft. What is the value of  $x$ ?
- 3) Angle ADC measures  $52^\circ$ . What is the measure of angle DCB?
- 4) Angle ABC measures  $(8x - 1)^\circ$  and angle ADC measures  $(5x + 20)^\circ$ . What is the measure of each of these angles?
- 5) Segment AP measures 33 cm. What is the measure of segment AC?
- 6)  $AD = 12$  ft,  $AB = 15$  ft. Find the perimeter and area.
