

Webpage Navigation

In Marine Biology, the course website will have the same features for each module. On the website, you will have the following menu items:

Introduction – First menu item to the left. This page contains a brief overview of the module, specific Marine Biology Standards addressed in a specific module, and a list of lessons covered within a specific module.

Lessons – Second menu item from the left. This menu item is where you will hover your mouse over each lesson in the dropdown menu under Lessons. Please read each lesson very carefully because you will have an assignment that correlates with each lesson.

Check for Understanding – Third menu item from the left. On this page, you will complete a self check like a quiz or a game that checks your understanding of the information presented within a specific module.

Tasks – Fourth menu item from the left. This page will contain a brief list of the assignments that are required to complete a specific module. Each lesson will have an assignment. The assignment will test the objectives within each lesson.

Resources – Fifth menu item from the left. This menu item is where you will hover your mouse over three sub menu items:

- **Documents to Print** – This page will have all of the lessons in a pdf format for you to either print or save to your local computer.
- **Further Investigation** – This page will be a summary of the lessons presented within a specific module. You will also see web links that you can visit to learn more information about specific topics within the module.
- **Course Glossary** – This page contains a complete glossary of words frequently used in the Marine Biology course.
