Early Screening Inventory-Revised (ESI-R)

Enduring Understanding
- The Early Screening Inventory-Revised is developmental screening that is administered to all Sure Start students within 45 days of enrollment, it is assist with identify children who may need assistance to perform successfully in school.

Essential Question(s)
1. What is the Early Screening Inventory-Revised?
2. What is the purpose of ESI-R?
3. How do administer the screening and use the results?

Outcomes
By the end of the session, participants will have:
- Received an overview of the Early Screening Inventory-Revised.
- Discussed and practiced administration and scoring for the ESI-R.

### Set Up

- Have all files downloaded to the desktop or a DVD in advance. This includes the power point presentation, and all references used during this training. **Rationale** – the internet may not be available from the work station you are using during this training.
- Check the **videos** embedded on specific slides to assure they play properly and the volume is adjusted appropriately.
- Make ALL copies – See Handout Section of this document.
- Set up the room to assure your audience can work with an elbow partner and in a small group.
- On the table, have the blank copy paper, highlighters, markers, stickers and poster paper.
- You will need to determine how you will distribute copies throughout the training depending on the size of your group.
- You will need to set up a Parking Lot at the front of the room.

### LINK TO ACCESS THE TRAINING MATERIALS

Please click the link below to access the Sure Start Program professional Development website.

https://content.dodea.edu/teach_learn/curriculum/ece/sure_start/training/index.html

### ADDITIONAL TRAINING MATERIALS

Teachers should bring the following materials:

- ESI-R Examiner’s Manual (blue)
- ESI-R materials kit (blocks, button, cards, car, tape strip, ball)
- Blank Paper
- Construction Paper if available

DoDEA Sure Start Programs use the Early Screening Inventory-Revised as the developmental screening tool to identify children who may need further evaluation.

The ESI-R is a standardized assessment/screening with a script for administration. It is important to keep a light atmosphere to help students feel comfortable, but it is also important to ensure that teachers do not “coach” children and administer the screening as designed so that scoring is valid.

- **Do not** use a readiness or skills assessment, nor an IQ test, nor an entrance exam.
- ESI-R takes about 15-20 minutes per student to administer.
- Completed within 45 days of enrollment.

**Please note that the CSC process at your school will probably require additional documentation before a referral can be made. If you have a student who may need help your first partner may...**

| **Let’s Look at the ESI-R** | 5      |           | 20 minutes | Click on the link to view the video and allow for a brief follow-up discussion if participants have questions. **

**NOTE:**
- Be the PSCD teacher at your school to suggest interventions to try. If in doubt ask your CSC chair for the school’s process.

**Getting Started** |
- Establishing rapport is important 😊
- Pick a location
- Screening Time
- Using the Score Sheet
  - Computing Rounded Age
  - Scoring/Notes
  - Completing the Score Sheet

**NOTES:**
- Handout: LaMarr’s Score sheet for discussion
- The goal is to obtain optimal child performance. It’s important that the child is at

</tr>
</tbody>
</table>

- Don’t refer to this as a test, say you are going to play some games together.
- Location is not specific but should be in a quiet environment without distractions if possible.
- The screening usually takes about 15-20 minutes
  - The sequence should be in the order it occurs in the manual
  - Instructions may be repeated except where otherwise noted
  - If a child refuses, the item can be re-administered later in the session. If this occurs it should be noted

Using the Score sheet
Computing rounded age: refer to page 11-12 in Examiner’s Manual - allow reading time and discuss questions
Scoring/Notes
Completing the score sheet: refer to page 13
Have a participants look over LaMarr’s Score Sheet and notice the notes that were made in the comments section. Lead a quick discussion around the Language & Cognition section B-Verbal Expression. Point out how the responses are recorded. Spontaneous vs. Elicited and the coding used C=color, N=name, S=shape, U=use & O=other
### Slide 7
**Time:** 40 minutes

Participants will need the ESI-R Examiner’s Manual and the materials from the kit to practice with one another. Each participant team will need one set of handouts and materials:
- ESI-P blank form
- ESI-K blank form
- Parent Questionnaire (sample/reference)
- ESI-R Examiner’s Manual
- Materials (blocks, ball, button, etc.)

Allow participants to practice administration of the ESI-P & ESI-K using script in the manual. Once they have been able to administer the screening a few times they will be able to use the script on the score sheet.

One participant can administer the ESI-P and switch roles for the ESI-K.

**Resources:**
- HO: ESI-P Blank form, ESI-K blank form, Parent questionnaire, Tips and Suggestions

### Slide 8
**Time:** 5 minutes

Review Learner Outcomes

Participants will:
- Understand the Early Screening Inventory-Revised, its purpose and how to administer the developmental screening to their students.
- The ESI-R is the developmental screening tool used in our Sure Start programs for identify students who may need additional support or referral.
- It should be completed within 45 days and results shared with parents at conferences.
### Handouts
